PROFESSIONAL SUMMARY

I am a current Mobile Application Development student focusing on Artificial Intelligence (AI), building a solid foundation in software development, with a growing interest in artificial intelligence (AI) and its real-world applications. I am developing skills in object-oriented programming (OOP), mobile application development, problem-solving, logical thinking, code organization, reusability, debugging, and testing to create efficient, dependable, and maintainable software. My goal is to expand my expertise in AI and mobile technologies while pursuing freelance projects and government contracting opportunities where I can contribute to innovative, secure, and practical software solutions.

TECHNICAL SKILLS

Programming Languages: C++, HTML, CSS
Software & Tools: Visual Studio, Git, GitHub, Microsoft Office
Technical Concepts: Object-Oriented Programming, Classes & Objects, Functions, Loops, Input Validation, Debugging, Version Control, Pull Requests

TECHNICAL EXPERIENCE

Current Course Project

- Developed a C++ console application using object-oriented programming.
- Implemented multiple classes, functions, and user input validation.
- Used Git and GitHub for version control using commits, branches, and pull requests.
- Tested, debugged, and refined the application through iterative development.
- Created technical documentation and a project demonstration.

PROJECTS

Bible Trail: Book of Genesis

My Genesis Journey project is a text-based adventure game developed in C++ where players travel through various locations while managing resources such as health, food, water, supplies, and morale. I used object-oriented programming to organize the game into classes, including Player, Traveler, Location, Event, Inventory, Save/Load System, and Game. The project also uses references, vectors, and callbacks to manage interactions between objects, handle inventory, and save game progress. These design choices make the program more organized, maintainable, and easier to expand

Technologies: C++, Visual Studio, Git, GitHub
Repository: https://github.com/GardDMobileDev/COS1-Project.git

EDUCATION

Full Sail University

Bachelor of Science in Computer Science
Expected Graduation: 05/2028

Relevant Coursework:
- Programming Fundamentals
- Object-Oriented Programming
- Software Development
- Version Control

EXPERIENCE (OPTIONAL)

US Military Veteran – AirForce Supply Technician

CERTIFICATIONS (OPTIONAL)

- GitHub Foundations
